$c_1 m \rightarrow abc$

$m c_2 \rightarrow \underline{bcc}$

Count all palindromic subseq. from given string:

Total Count $\rightarrow c_1 + c_2 + c_3 + c_4$
[without impact]

$$ch_1 == ch_2$$

$$ch_1 \neq ch_2$$

$$\text{Total count} = c_1 + c_2 + c_3 + c_4$$

we know that $ch_1 == ch_2$

$$\Rightarrow \underline{c_4 = c_1 + 1}$$

$$\begin{aligned} \text{Total Count} &= c_1 + c_2 + c_3 + c_4 + 1 \\ &= \underline{(c_1 + c_2)} + \underline{(c_1 + c_3)} + 1 \end{aligned}$$

$$\text{Total Count} = c_1 + c_2 + c_3 + \cancel{c_4} \rightarrow [0]$$

$$\begin{aligned} &= \underline{c_1 + c_2} + \underline{c_3 + c_1} - \underline{c_1} \\ &= (c_1 + c_2) + (c_1 + c_3) - c_1 \end{aligned}$$

$$\text{Total Count} = c[s(m ch_2)] + c[s(ch_1 m)] - c[s(m)]$$

$$\text{Total Count} = c[s(m ch_2)] + c[s(ch_1 m)] + 1$$

abccbcb
