Bellman Ford Algorithm

Saturday, 30 October 2021 10:14 AM

- * Shortest path from single source to all destination. in terms of weights [it includes -ve weights as well].
- * -ve weight cycle detection.

$$0 - 4 = 8$$

$$0 - 4 = 5$$

$$i=2$$

$$i=4$$

0	1	2	3	4	5
0	∞	∞	∞	∞	∞

P1 * Src to Src smallest cost = 0

NOTE: Because -ve wt cycle will consider therefore Src to Src smallest cost is 0.

P2 * consider fix order of Edges and solve for $(n-1)$ time.

in i^{th} iteration shortest path length should be 'i'.

$$i=2$$

consider order of Edge \rightarrow

Iteration \rightarrow V-1 Iteration.

	0	1	2	3	4	5
path	0	4	11	3	5	8

i^{th} path length $\leq i^{\text{th}}$ iteration

u	v	wt	Iteration
4	5	3	1 ✓
3	4	2	2 ✓
2	5	-2	
2	3	-8	3 ✓
1	2	7	4 ✓
0	3	6	5 ✓
0	1	4	

u-v - Edge.

if ($\text{path}[u] + \text{wt} < \text{path}[v]$)

$\text{path}[v] = \text{path}[u] + \text{wt};$

Note: i path length will definitely solve till i^{th} iteration -
why we iterate $(V-1)$ times??

V vertex
Edge $\rightarrow (V-1)$ Edges

$(V-1)$ time
iterate for
path length.

-ve wt
cycle is
not consider

it also take at max
 $(V-1)$ distance

try to solve \rightarrow (pen paper)

0	1	2	3	4	5
0	∞	∞	∞	∞	∞
	4	11	6	5	9
			3		8

Edges-

$\underline{0} \rightarrow \underline{1}$

$0 \rightarrow 3$

$1 \rightarrow 2$

$2 \rightarrow 3$

$2 \rightarrow 5$

$3 \rightarrow 4$

$4 \rightarrow 5$

wt

6

1 ✓
2 ✓

3 ✓

4 ✓

5 ✓

if ($\text{path}[u] + \text{wt} < \text{path}[v]$)
 $\text{path}[v] = \text{path}[u] + \text{wt};$

Negative Weight Cycle Detection

Saturday, 30 October 2021 11:48 AM

⑦

$$1 + \cancel{6} + \cancel{1} + \cancel{(-10)} + (-2) + \cancel{1} = \textcircled{5}$$

$$\text{src} = 0, \text{dst} = 5$$

$$0 - 1 = 4$$

$$0 - 0 = \textcircled{0}$$

$$-3 - 2 = -5 + 1 = \textcircled{-4}$$

Bellman find $V = -6$

5 iterations

6th iteration

Result update.

→ -ve wt cycle exist

⑦

Remove Max Number of Edge

Saturday, 30 October 2021 12:16 PM

Green \rightarrow type - 3

Yellow \rightarrow type - 1

skyblue \rightarrow type 2

3 \rightarrow Edge from Bob and Alice both can travel

1 \rightarrow Edge from Alice can travel

2 \rightarrow Edge from Bob can travel

Sort on the basis of type.

type	u	v
3	1	2
3	2	3
2	3	4
1	1	3
1	2	4
1	1	4
1	2	3
